VARINHAS

Figure 1 displays five horizontal bar charts, each representing a different scenario. The y-axis for all charts is labeled 'CARGAS' and the x-axis is labeled '#'. The charts show the distribution of cargo types across different categories, with the number of units represented by the width of the bars and the percentage represented by the shaded area.

- Scenario 1 (Top):** Shows a distribution where the first category (represented by #) has a value of 100% (indicated by a gray square) and the second category (represented by %) has a value of 100% (indicated by a gray square).
- Scenario 2:** Shows a distribution where the first category (represented by #) has a value of 100% (indicated by a gray square) and the second category (represented by %) has a value of 100% (indicated by a gray square).
- Scenario 3:** Shows a distribution where the first category (represented by #) has a value of 100% (indicated by a gray square) and the second category (represented by %) has a value of 100% (indicated by a gray square).
- Scenario 4:** Shows a distribution where the first category (represented by #) has a value of 100% (indicated by a gray square) and the second category (represented by %) has a value of 100% (indicated by a gray square).
- Scenario 5 (Bottom):** Shows a distribution where the first category (represented by #) has a value of 100% (indicated by a gray square) and the second category (represented by %) has a value of 100% (indicated by a gray square).
