The diagram illustrates the growth of a pattern on a 3x3 grid over five steps. Each step is represented by a row of three 3x3 grids. The first grid in each row shows the state at that step, followed by a plus sign and a grid showing the change (black cells for additions, white for deletions).

- Step 1:** The first grid has a single black cell at (1,1). The change grid has a single black cell at (1,1).
- Step 2:** The first grid has black cells at (1,1), (1,2), and (2,1). The change grid has black cells at (1,2) and (2,1).
- Step 3:** The first grid has black cells at (1,1), (1,2), (1,3), (2,1), and (2,2). The change grid has black cells at (1,3) and (2,2).
- Step 4:** The first grid has black cells at (1,1), (1,2), (1,3), (2,1), (2,2), and (2,3). The change grid has black cells at (2,3).
- Step 5:** The first grid has all nine cells black. The change grid has black cells at (3,1), (3,2), and (3,3).
